

Sainsbury Wellcome Centre

Emerging Neuroscientists Seminar Series

Apply by 30 June 2026

Aspiring future leaders in neuroscience are invited to present their research in London as part of the SWC's Emerging Neuroscientists Seminar Series.

The Sainsbury Wellcome Centre for Neural Circuits and Behaviour (SWC) brings together world-leading scientists to investigate how brain circuits generate perception, form memories, and guide behaviour.

We welcome applications from postdoctoral researchers around the world. Travel and accommodation costs will be covered. Joint talks from co-authored works are eligible.

Applications are judged on the quality of the science. No CV or recommendation letters required.
