Research networking & translational neuroscience

Cambridge Parkinson’s Disease Symposium

Join us to hear from leading Parkinson's experts from across the UK, as well as local research teams. Together we will be discussing recent advances and emerging directions for better understanding and treating Parkinson's disease.

Talks will cover developments across a spectrum of translational research, including genetics, neuropathology, molecular biology, epidemiology, biomarkers and clinical trials.

Jeffrey Cheah Biomedical Centre
Tuesday 1 December
9:30 AM - 4:30 PM

For: Researchers, clinicians and students
